I am a full-stack software engineer passionate about developing and maintaining reliable, user-friendly software. I am experienced in automated testing and working remotely while collaborating and communicating effectively.

Technologies and Languages

- Languages: Javascript, Typescript, Go, Python, Ruby, Kotlin
- Technologies: Postgres, AWS, Git, React, Node.js, Flask, FastAPI, Spring Boot

Work Experience

Senior Frontend Engineer **Procore (Alexandria, Egypt - Remote)** **Nov 2025 - Present**

- Developing a handful of frontend tools in the Procore app
- Developing end-to-end tests
- Mentoring juniors and mid-seniors

Senior Frontend Engineer **Rentinit (Alexandria, Egypt - Remote)** **Mar 2025 - Nov 2025**

- Developed the Rentinit web app (fullstack) from scratch as part of a two-person team.
- Developed End-to-End tests that reduced production bugs by 90%.
- Established guidelines and best practices for the frontend project.

Senior Fullstack Engineer **Ernest (Alexandria, Egypt - Remote)** **May 2024 - Feb 2025**

- Mentored team members 1:1 and through code review in best practices for developing React components.
- Introduced compression and code-splitting to the frontend, cutting down the loading time of the app by 50%.
- Integrated our bidding system with HubSpot, saving bidding coordinators ~2h a day of work to synchronize bids.
- Developed a Kanban board from scratch for managing tasks in the Ernest app.
- Delivered full-stack features with Go on the backend and React and Typescript on the frontend.

Senior Fullstack Engineer **Tempo (Alexandria, Egypt - Remote)** **July 2022 - April 2024**

- Led the internal tooling team for the first year, delivering critical features to employees of the company.
- Handled on-call incidents with successful resolution. Reduced TTM (time to mitigate) from ~20 min to ~6 min.
- Worked on a real-time messaging service (cloud trainer) for workout guidance for users of Tempo.
- Worked on the backend with Python and the frontend with React, Typescript, and Electron.

Senior Fullstack Engineer **Knowledge Officer (Alexandria, Egypt - Remote)** **May 2020 - June 2022**

- Mentored our team through 1:1s, sessions, and code review on best practices with React and Ruby on Rails.
- Developed a round-robin booking mechanism for pairing mentors with students in the KO App.
- Rewrote the homepage of Knowledge Officer using next.js, increasing its Lighthouse score from 30 to 85.

Fullstack Software Engineer **Careem (Cairo, Egypt)** **Feb 2019 - May 2020**

- Created, along with my team, an internal portal for Careem Bus schedules and lines using React and Node.js.
- Mentored engineers in Typescript, React, and Node.js 1:1 and through code review.
- Fixed issues on the Careem Bus backend, reducing 500 server errors by 30%.

Fullstack Software Engineer **friday.de (Berlin, Germany)** **Dec 2017 - Oct 2018**

- Helped solve architectural issues (with React and Redux) in the web app in Typescript.
- Fixed bugs and delivered new features in the sales funnel and user portal.
- Created a new backend service with Spring Boot and Kotlin, scaffolding the project and using reflection to determine body parameter types.

Fullstack Software Engineer **Didaris (Berlin, Germany)** **Feb 2017 - Oct 2017**

- Introduced git and composer to the PHP backend project.
- Introduced javascript to the frontend project, adding dynamic interaction for the user and reducing page reloads.

Junior Software Engineer **Eventum IT Solutions (Alexandria, Egypt)** **Aug 2014 - Aug 2016**

- Created a PDF generator on the backend using Spring Framework, Java, and Node.js, and websockets.
- Introduced React to the frontend, scaffolding an entire rewrite of the project.
- Taught the rest of the team how to work with React through sessions, 1:1s, and code reviews.

Education and Certifications

- **B.Sc. Computer Engineering,** Alexandria University **2009 - 2014**
